

“The “secret sauce” for our future success will be built around the EPEQ® system. It gives us a competitive advantage and allows us to provide services we wouldn’t necessarily be able to provide with a conventional gasoline setup.”

Joel H.

“One of the reasons we went with Vanair® is their engineering staff. They work very closely with our engineering staff to design a system to perfectly fit our truck, and customers have loved it so far.”

Chris F.

“The functionality of the EPEQ® system has been perfect. It’s quiet, there’s no pounding of a loud air compressor. It operates the balancer on our tire machine without issue.

Frank W.

VANAIR®
A Lincoln Electric Company

Industry Leading Mobile Power Solutions®

THE VANAIR® ADVANTAGE //

Industry Pioneer

As the inventor of vehicle-mounted mobile power equipment, Vanair® remains at the forefront, delivering innovative Mobile Power Solutions® tailored for the demands of today's work trucks.

Comprehensive Solutions

A complete portfolio of Mobile Power Solutions® designed to maximize productivity.

Proven Reliability

More than five decades of engineering expertise serving the demanding work truck industry.

Backed by Lincoln Electric

Empowered by the resources, expertise, and heritage of a company with more than 130 years of manufacturing leadership.

A POWERFUL PAIRING OF INDUSTRY LEADERS //

In 1972, Vanair® engineers developed the world's first vehicle-mounted, PTO-driven underdeck rotary screw air compressor, integrating what had previously been a bulky tow-behind machine directly onto the truck's frame and powering it through the vehicle's own drivetrain. That single invention eliminated a separate engine, freed the truck's hitch, reclaimed valuable bed space, and reduced maintenance costs across the board. An entire industry was born from one engineering decision made in New Buffalo, Michigan.

Since then, Vanair® joined the Lincoln Electric family, creating a global powerhouse in manufacturing and technology with over 184 years of combined excellence. With Vanair's mastery of Mobile Power Solutions® with Lincoln Electric's legendary leadership in welding, cutting, and industrial technologies, it offers customers new possibilities for innovation, quality, and world-class support.

THE "GO TO MANUFACTURER" FOR REAL WORLD // MOBILE POWER SOLUTIONS®

Vanair® is not a distributor or an assembler of components. It is an engineering-driven manufacturer. The company's relentless pursuit of innovation has led to a series of industry firsts, each one crafted to solve real-world challenges faced by customers in the field, with our comprehensive product line:

- Air compressors
- Generators
- Engine-driven welders
- Hydraulic systems
- Battery chargers and boosters
- Electrified and hybrid power equipment
- Multi-function power systems for work trucks and service fleets

From utility and telecom crews to municipalities, railroads, construction contractors, and fleet operators, Vanair® Mobile Power Solutions® drive productivity, performance, and value every single day, year after year.
